merica's Army is a trained and ready force that faithfully serves our Nation at home and abroad — a strategic force capable of decisive victory. It's a Total Force of Active, Guard, and Reserve soldiers, Army civilians and contractors, capable of projecting power any place in the world, any time, and against any foe.

The United States Army Materiel Command (AMC) is a critical organizational element of the Total Force. AMC equips and sustains this power projection force through superior technology and responsive support. Through our major subordinate commands, we direct the activities of our depots, arsenals, ammunition plants, laboratories, proving grounds, and procurement offices throughout the world.

To accomplish this extremely complex mission, AMC depends on the defense industrial base. This base includes large and small businesses. Also, it encompasses higher educational institutions, including historically black colleges and universities and minority institutions. AMC relies on the teamwork of these businesses and institutions.

We hope this pamphlet will be a valuable resource to any organization wanting to do business with AMC. It provides points of contact throughout AMC. These contacts are a starting place for an organization to effectively market its capabilities within the AMC major subordinate commands for commodities, research, and development.

All major subordinate commands have Small Business Specialists. These specialists help facilitate and offer suggestions on how best to do business within that command. I encourage you to use this information to its fullest extent. There are thousands of business opportunities. Market yourself wisely to help AMC realize its strategic vision. Be a part of our team

\*AMC-P 715-14

#### **FOREWORD**

This pamphlet serves multiple purposes. It introduces the U.S. Army Materiel Command (AMC) and what AMC buys. It explains how to do business with AMC by providing points of contact throughout the major subordinate commands (MSC). This pamphlet and additional information can be accessed through the AMC World-Wide Web Home Page at http://www.amc.army.mil.

How to do Business with AMC offers assistance to those managing the marketing efforts for all businesses and other organizations. It provides an overview of some products and services procured by the MSCs. It geographically depicts the locations of AMC Headquarters and the AMC MSCs.

After reading this pamphlet, you may seek specific advice from the Small Business Specialists located at each MSC. They will assist by providing information on procurement procedures and opportunities.

AMC is committed to ensuring small business involvement in the acquisition programs.

<sup>\*</sup> This pamphlet supersedes AMC-P 715-14, June 1999.

# U.S. ARMY MATERIEL COMMAND (AMC)

The U.S. Army is a strategic force capable of decisive victory any time, any place, against any foe. The U.S. Army Materiel Command (AMC) supports the Army with equipment and technology essential to success on the battlefield. We ensure our equipment is the best in the world.

In a sense, AMC has been around since the founding of the Army itself. For hand-in-hand with the existence of a fighting force goes the mission to provide its members with food, arms, and supplies.

Today, that mission is being carried out by more than 50,000 people, working in 149 locations, 59 installations and 115 organizations in 41 states and 38 countries. With headquarters in Alexandria, Va., the AMC operates through major subordinate commands and directs the activities of its depots, laboratories, arsenals, manufacturing facilities, maintenance shops, proving grounds, test ranges, and procurement offices throughout the world. Its complex missions range from the development of sophisticated weapon systems, to laser research, to the distribution of spare parts. In carrying out these responsibilities, AMC touches every soldier in the Army every day.

AMC makes its primary contributions to the U.S. Army in three main areas. These "core competencies" are the heart of what AMC is all about: Acquisition Excellence, Logistics Power Projection, and Technology Generation and Application.

AMC is big business. It manages inventory accounts worth tens of billions of dollars and ranks in

business volume with the top ten corporations in the United States.

To develop, buy, and maintain materiel for the Army, AMC works closely with industry, as well as colleges and universities, to ensure that state-of-the-art technology is integrated for the defense of the nation. Soldiers, many with highly developed specialties in weapons development and logistics, work side by side with a large civilian work force — over a quarter of the civilians working for the Army. They are scientists, engineers, systems analysts, accountants, computer programmers and many others.

Working shoulder to shoulder, these military and civilian professionals also handle such diverse tasks as acquiring ammunition for all of the U.S. military services, managing the sale of Army equipment and services to friends and allies of the United States, and negotiating and implementing agreements for co-production of U.S. weapon systems by foreign nations.

AMC stands for quality — in all it does.

IF A SOLDIER shoots it, drives it, flies it, wears it, or eats it, AMC provides it.

Mission: Conduct, perform, or manage basic and applied research and engineering, acquisition, integrated logistics materiel readiness management, advanced development and maintenance support functions for all assigned (aviation/missile weapons) systems/ subsystems and associated equipment. Execute assigned missions in support of Program Executive Officers (PEO)/Project Managers (PM) or other DOD elements having centralized management responsibility for specific weapon systems or items. These support missions include procurement, production, engineering, system engineering, product assurance, materiel management, system safety engineering, maintenance engineering, integrated

logistics, configuration management, security assistance management activities, resource management, and staff and base support activities as required in such areas as legal financial management personnel, and installation management. Manage DA test, measurement, and diagnostic equipment (TMDE) acquisition, logistics, and support as specified in AR 750-43. Exercise command, control, and supervision of assigned activities and installations. Overhaul Army helicopters for major programs, and test, repair, rebuild, modification, and storage for 19 different missile systems.
